

Form: DA Submission
Reference No: 5d06f2833d7a4
Received: 17/06/2019 11:53:07 AM
Development Application: 011.2019.00056560.001
Applicant: Service Stream Network Construction
Description: Telecommunications Facility
Comments: Industry code C564:2018 states under the objectives of the code, section 4, "To ensure relevant stakeholders are informed, notified or consulted and engaged with before mobile phone radiocommunications infrastructure is constructed."As I was only made aware of this DA by word of mouth and consulting with others in my neighbourhood, I find that none have received notification by mail.Subsequent to awareness, I have been unable to obtain requested information regarding the permissible frequencies of operation for this tower. For example will it be operating in the millimetre wave bands (24GHz - 86GHz).Under these circumstances and the knowledge that many other residents are unaware of this DA which appears to be accepted without their knowledge. I hereby submit my objection.
