

Form: DA Submission
Reference No: 5d0c63d9b4e5a
Received: 21/06/2019 02:58:01 PM
Development Application: 011.2019.00056560.001
Applicant: Service Stream Network Construction
Description: Telecommunications Facility

Comments: DA56560 is seeking approval of a construction under the Communications Alliance Ltd Industry Code C564:2018 and I believe that I am a legitimate Stakeholder with respect to that code. In accordance with the above, I am of the opinion that many residents have been denied a fundamental objective of the code to ensure relevant stakeholders are informed, notified and engaged with..1. I do not believe reasonable effort was made to ensure I was notified.2. Documentation only refers to the 3G and 4G networks. I wish to be advised if there is any chance that the 5G will be included on this tower at a later date and if so; at what frequencies will it operate i.e. 6GHz - 100GHz and the calculated EME's.3. In the environmental EME Report submitted the Maximum Cumulative Level for the proposed configuration would appear to have been calculated at 4 locations but no exact locations for reference and Havendale appears to have been excluded. I believe both elevation and distance are important factors and the only elevations quoted are 0-6M. If the 0-6M is only a calculation based on 0-6M above the ground quoted in their drawing CCR-NSW-19 then I believe it to be inadequate. Without the ability to gain knowledge in a timely manner I have no alternative but to object to the DA. Footnote: I am surprised that Pioneer Park at the southern end of point Fredrick was not included in the alternative sites for consideration. This location would appear to facilitate good communication to: Caroline Bay, East Gosford, Erina, Green Point, Yattalunga, Saratoga, Woy Woy, Koolewong, Tascott, Point Clare, West Gosford, a large portion of Gosford and the entire rail corridor from Woy woy.
