**Importance:** High

**Record Number:** [REDACTED]

Dear Mr Murphy,

I am writing because we have been contacted by [REDACTED] regards to the DA for the proposed 5g Tower in Saratoga.

I have attached their correspondence below for your convenience.

Any advice you have is appreciated.

Kind regards,

[REDACTED]

**Importance:** High

STOP the TELSTRA TOWER at Saratoga.....

As a local home owner & the owner of another 3 properties in the Saratoga/Davistown area I strongly object to any 5G transmission masts being placed in built up areas of the Central Coast particularly - Saratoga and raise the following:

1/ Microwave energy produced by these installations in Australia is not to as high a standard of safety as other countries in the world. So there is a question why not?

2/ These 5G installations are being put into suburbs where fibre optics should have been run in by the NBN. Why are people of the coast being subjected to another new technology that is an environmental eyesore, when fibre to the premises is better both safe & underground?

3/ The NBN is a failure on the Central Coast in many areas, as they cannot deliver the Governments required line speed requirements via Fibre to the node technology. Council should reject 5G and send a clear message to the Federal Government to fix the NBN.

4/ 5G is being pushed supposedly to increase data transmission on mobile phones? Why put these ugly 5G towers into suburbs like Saratoga under some illusion businesses run on mobile phone data.

5/ If 5G is as safe as 4G then why do they have to build higher towers & not just put them on buildings like 4G or lower towers?

I implore Central Coast Council to stand up for its residents against greedy telecommunications companies. To fight to keep our environment safe & free of these hideous structures.

Please do not allow this to happen.....
