## Your Submission

Development Application: 011.2020.00057958.001

Applicant: Kordia Solutions Pty Ltd - QLD

Description: Telecommunications Tower

Comments: I strongly oppose the proposal for the following reasons 1. The proposal is contrary to the stated objective of the R2-Low Density Residential Zoning. 2. The development is prohibited in a R2-Low Density Residential zoned area. 3. The height of the tower is more than 3 times the height allowed in this area, exceeding it by 18.3m. 4. The tower located in such a prominent position will have a significant impact on and adversely affect the residential amenity beyond the level reasonably required for low-density housing. 5. The development is not in the public interest due to a decreased level of public amenity and the negative visual impact. 6. The EME data included in the report is not accurate or thorough, and an assessment of the impact of the Electromagnetic Emissions on all dwellings within 1Km of the proposed site MUST be carried out prior to approval being considered. 7. As a large group of eminent scientists have called for a moratorium on the deployment of 5G and demand that governments fund the research needed to adopt biologically based exposure limits that protect our health and safety. The Council, if it approves the construction of a 5G tower in an area where the zoning prohibits such development, especially when the development is more than 3 times the maximum height allowed, may find itself held liable for any damage that development causes to the community or those living near that development. 8. I urge the council to only allow the construction of 5G telecommunications base stations in areas zoned commercial, or industrial, or in areas not zoned residential.
