Applicant: Kordia Solutions Pty Ltd - QLD
Description: Telecommunications Tower

Comments: I strongly object to the proposed submission of erecting a telecommunications tower in Saratoga. My reasons are as follows: 1) The possible effects of radiation which would impact local residents. EME reports show evidence of a significant increase in radiation. I am not willing to risk my health or those of my family with having this so close to home. 2) The visual impact on the local area. This will be an eye saw and impact many residents view from their homes. This impacting property values. Especially as the location is in the middle of a residential area. See Section 6.0, conclusion, page 47 3) Refer to LEP table 4 page 30 as this does tower does not coincide with safeguarding the character and scenic landscapes of Saratoga. 4) Table 3 page 28 the visual impact assessments are not accurate with current vegetation or views of surrounding properties. 5) Table 2 page 20 as per (b) the proposed development does not satisfy of this requirement. 6) under section 1.3 on page 11 "the proposed land use is consistent with setting and generally compatible with adjoining land uses" this is false given a 2 tower in low density residential area does not fit in. 7) Page 10 what other suitable candidate sites were considered as the proposal doesn't mention them? 8) Page 8 a 27m tower in an R2 zoned area is not compatible with minimal adverse impact. I ask you please review my points. This is a tranquil and scenic part of the Central Coast. Not only would this tower not fit with the local surrounding and buildings it has health effects to those that live and visit the beautiful Saratoga. Please consider the almost identical issue I'm regards to the Wyoming Optus 5G Tower. We as a community don't want this in our yards when there are other remote areas that it could go that wouldn't cause such an impact on a local community. Thank you for your time.
